Dedicated and productive individual looking for a demanding role in JavaScript full stack development. I'm excited to use my MERN stack knowledge to promote teamwork, simulate creativity, and accomplish organizational objectives. I'm dedicated to producing excellent work and always broadening my skill set in a fast-paced, growth-oriented atmosphere.

EXPERIENCE

Intern full-stack developer

Kumaripati, Lalitpur, Nepal

TechAxis

Nov, 2023 - May, 2024

- Use current technologies to design, develop, and execute web-based applications in cooperation with the development team.
- Contribute to the front-end and back-end development and upkeep of web apps.
- To guarantee code quality and adherence to best practices, take part in code reviews and offer helpful criticism.
- To create responsive and user-friendly web interfaces from design mockups, collaborate closely with UX/UI designers.
- Help with debugging and troubleshooting problems that users have reported or that are found during testing.

Remote MERN stack developer

Helsinki, Finland

FinNep

Dec, 2023 - Present

- Built front-end of websites through appealing visual design.
- Attended regular team meetings to contribute strategic and creative solutions.
- Maintained websites through ongoing updates, optimization and refreshes.
- Continuously studied and improved abilities with wide range of web technologies, design tools and programming practices.

Full-stack Developer(MERN)

Kumaripati, Lalitpur, Nepal

TechAxis

May, 2024 - Present

- Front-end: Fix design issues to ensure a seamless and visually appealing user experience across various devices and browsers.
- API Integration: Integrate RESTful APIs to create dynamic and interactive web pages, enhancing functionality and user engagement.
- Responsive Design: Implement responsive design principles to ensure web applications work flawlessly on desktops, tablets, and mobile devices.
- Performance Optimization: Optimize front-end and back-end code to improve the performance and scalability of web applications.
- Collaboration: Work closely with designers, product managers, and other developers to translate requirements into technical solutions.
- Code Reviews: Conduct thorough code reviews to maintain high code quality and adherence to best practices.
- Version Control: Utilize Git for version control to manage and track changes in the codebase efficiently.
- Testing and Debugging: Perform rigorous testing and debugging to identify and fix bugs, ensuring the reliability and stability of applications.

EDUCATION

Bachelors in Information Technology

Kaithal, Haryana, India.

Northern Institute for Integrated Learning in Management

Aug, 2021 - Present

PROJECTS

ACHIEVEMENTS

Completion of internship

I successfully finished a number of projects during my six-month internship that required me to slice designs from Figma and execute them using front-end technologies, especially Next.js. For back-end development, I also used Next.js, which guaranteed smooth integration and effective performance throughout the entire stack. My ability to transform design specs into responsive and useful web applications, as well as my proficiency in front-end and back-end development, were all enhanced by this experience.

TRAINING/CERTIFICATIONS

Data science with python

2023

Broadway infosys

MS-SQL

2023

Coding Technology

MERN stack

2024

TechAxis

SKILLS

MongoDB, Express.js, React.js, Next.js, Node.js, Tailwind Css, Python for Data science, MS-SQL, Mantine ui, Trello, Git & Github, git, GitHub and GitLab, TypeScript

LANGUAGE

English, Nepali
